

## PT1KCON Connector Wiring Assignment Change

**PT1KCON Connector**

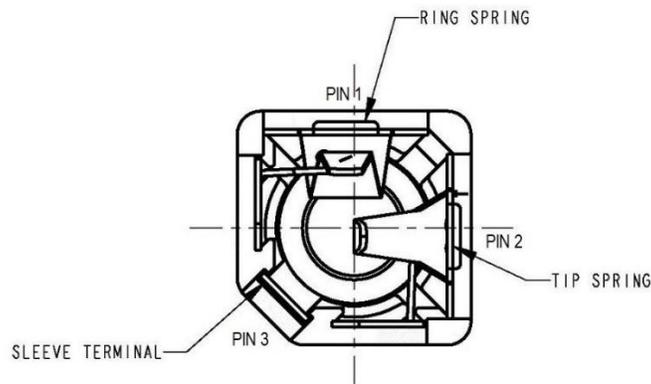

If you had purchased our SMD-200 w/ PT1KCON connector, WSD-SMD-A(KIT-SMD) or SMK101(KIT-SMK101) control panel before August 2020, please modify the wiring on the PT1KCON for our new PT1000 sensor.

**Cabin Sensor (Old Version)**

**Food Sensor (Old Version)**

Old wiring assignment: PIN 3 to Terminal 11, PIN 2 to Terminal 10 or 12, PIN 1 is for ground (enclosure). This wiring assignment can only be used with our old style PT1000 sensor.

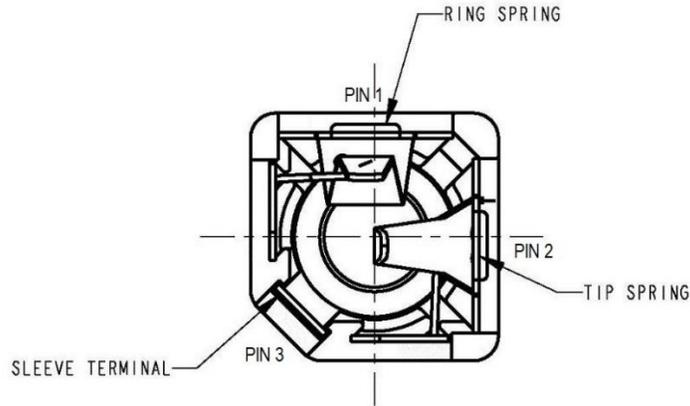

The old version sensors have white Teflon cable and 2-Pin 6.35mm phone jack connector (only one black ring on the connector tip). While our new sensor comes with stainless steel cables and stereo 3-Pin 6.35mm phone jack connector (two black rings on the connector tip).

**Cabin Sensor (New Version)**

**Food Sensor (New Version)**

New wiring assignment: PIN 1 to Terminal 11, PIN 2 to Terminal 10 or 12. This new wiring assignment can be used for both old style and new style sensors.

Below is the wiring terminals for SMD-200 controller.
